DOWNLOAD & UNZIP

- 1 Your files are ready the moment payment clears — download them from Etsy.
- 2 Tap the **share** icon and choose **Save to Files**. Pick a folder you'll remember.
- 3 Open the **Files** app and tap the **.zip** — it unzips itself into a folder.
- 4 Inside, each set has its own folder of individual, pre-cropped stickers.

Keep the unzipped folder in Files rather than Photos — GoodNotes imports from Files far more smoothly.

USING YOUR STICKERS

Three ways in

METHOD 1 · ELEMENTS — SAVE ONCE, REUSE FOREVER

- 1 Open any notebook and tap the **Elements** tool, then scroll to the end of the list and tap the **plus** sign.
- 2 Name the collection (**GOYO Shapes**, **GOYO Widgets...**), tap **Import From** and pick your folder.
- 3 Select the stickers you want, then tap **Create**.

METHOD 2 · IMAGE TOOL — ONE AT A TIME

- 1 On your planner page, select the **Image** tool and choose **Insert From**.
- 2 Pick a sticker; drag the corners to resize.

METHOD 3 · STICKER BOOK — COPY & PASTE

- 1 Open **goyo-stickerbook.goodnotes** beside your planner in **Split View**.
- 2 Lasso a sticker, choose **Copy**, then paste it onto your page.

GOOD TO KNOW

Every sticker is 2× — crisp when you scale it up. All six sets share one palette, so anything pairs. Notability, Noteshef and GoodNotes accept the PNGs (the **.goodnotes** book is GoodNotes-only). For your own planning, please don't resell or share. Something off? Message me through Etsy — and thank you for supporting a small studio.
