GETTING STARTED

Download & unzip

- 1 Your files are ready the moment payment clears. Download them from Etsy on your iPad — or on a computer, and send them across.
- 2 Tap the download; it opens in a new window.
- 3 Tap the **share** icon (the arrow pointing up) and choose **Save to Files**. Pick a folder you'll remember.
- 4 Open the **Files** app and tap the **.zip** — it unzips itself into a folder.
- 5 Inside you'll find one folder per set, each holding its individual pre-cropped stickers.

A NOTE ON STORAGE

Keep the unzipped folder in **Files** rather than Photos — GoodNotes imports from Files far more smoothly.

METHOD 1 · ELEMENTS

Best for everyday use

Save the stickers into GoodNotes once, then reach them from any notebook, forever.

- 1 Open any notebook and tap the **Elements** tool in the toolbar.
- 2 Scroll the bottom list to the end and tap the **plus** sign.
- 3 Name the collection — **GOYO Shapes**, **GOYO Widgets**, and so on. One collection per folder keeps things tidy.
- 4 Tap **Import From** and find your unzipped folder.
- 5 Select the stickers you want, then tap **Create**.

FASTER · SPLIT VIEW

Open **Files** beside GoodNotes. In Files tap the **...**, choose **Select**, then **Select All** — drag the whole stack into the new collection window and let go.

-

METHOD 3 · STICKER BOOK — COPY & PASTE

- 1 Open **goyo-stickerbook.goodnotes** — tap it in Files and choose **Open in GoodNotes**.
 - 2 Open it beside your planner in **Split View**.
 - 3 Lasso a sticker, tap the selection, choose **Copy** — then paste it onto your page.

GOOD TO KNOW

Care & terms

Resizing

Every sticker is 2× resolution, so it stays crisp when you scale it up — even on an iPad Pro.

Mixing

All the sets share one palette. Any sticker sits happily beside any other.

Other apps

Notability, Noteshef and GoodNotes all accept these PNGs. Only the **.goodnotes** book is GoodNotes-only.

Personal use

These stickers are for your own planning. Please don't resell, share or redistribute the files.
